MCCORMACKS AUSTRALIA

PRODUCT CATALOGUE

Explore the complete McCormacks Australia range, from structural and performance materials to interior and exterior timber solutions, alongside the specialist building brands we proudly represent.

RANGES INCLUDE

- MAGNUM BOARD
- APPEARANCE HARDWOOD
- THERMORY
- LININGS & PANELS
- SAVEBOARD
- TERRA LANA WOOL INSULATION
- CLADDING & DECKING
- STAIRS & HANDRAILS
- STRUCTURAL TIMBER
- EARTHEN PLUS
- FLOORING & OVERLAY
- MOULDINGS & ARCHITRAVES

ABOUT MCCORMACKS AUSTRALIA

ESTABLISHED 2001

BUILDING BETTER, FOR MORE THAN 20 YEARS.

McCormacks Australia provides a comprehensive range of building materials for today's construction industry, spanning structural and performance products, interior and exterior solutions, insulation, timber and finishes.

Established in Victoria in 2001, McCormacks began with a focus on supplying quality Australian timber. More than two decades later, the family-owned business has grown into a trusted national supplier, with products available through major retailers and trade merchants across Australia.

While timber remains an important part of the McCormacks story, the range has evolved to address some of the key challenges facing modern construction. This includes supporting healthier working environments for trades, reducing waste through circular solutions, and introducing innovative materials that deliver greater performance, durability and sustainability.

Today, McCormacks continues to seek out products and partnerships that challenge conventional approaches to building materials. From established timber products to innovative building boards, natural wool insulation and next-generation material solutions, each range is selected with a focus on providing practical, high-performing options for the Australian construction industry.

Underpinning it all is the same family-led approach McCormacks was built on: quality products, trusted relationships, industry knowledge and a commitment to better building.

STRUCTURAL & PERFORMANCE

ENGINEERED FOR STRENGTH, PERFORMANCE AND BETTER BUILDING.

McCormacks Structural & Performance range brings together high-performing building materials designed to meet the demands of modern construction across residential, commercial and specialist applications.

From structural timber and magnesium oxide boards to plastering systems, recycled panels, insulation and landscaping products, the range combines proven performance with innovative material solutions.

With a focus on strength, durability, compliance, healthier materials and more sustainable construction, these products provide practical solutions for building better from the structure out.

MAGNUM® BOARD

THE MODERN CONSTRUCTION SYSTEM FOR HEALTHIER, HIGH-PERFORMANCE BUILDING.

Magnum Board is a new-generation magnesium oxide building board designed as a versatile alternative to traditional plywood, gypsum and cement-based substrates. Suitable for both internal and external applications, the range includes weatherboards, cladding, tongue and groove flooring underlay and Ezi-Line wall sheets.

Engineered for strength, stability and durability, Magnum Board provides a breathable building solution that performs across a wide range of conditions and applications. Its resistance to fire, moisture, mould and insects makes it particularly suited to demanding environments, including wet areas, tiled floors, balconies and construction in bushfire-prone areas.

Silica free and manufactured without harmful chemicals, Magnum Board also supports healthier conditions for trades during installation and contributes to healthier, more sustainable buildings over the long term.

Independently appraised in Australia and internationally, the system is designed for efficient fabrication and installation, helping reduce construction times while providing flexibility across residential and commercial projects.

McCormacks Australia is the exclusive Australian distributor of Magnum Board products.

FEATURES & BENEFITS

- Silica free for a healthier approach to cutting and installation
- Non-combustible with zero flame spread
- CO_2 negative building material
- High impact resistance for strength and durability
- Moisture, mould and insect resistant, making it ideal for demanding and wet-area applications
- Breathable construction to support healthier building systems
- Excellent adhesion across a wide range of finishes
- Internal and external applications for greater versatility across a build
- Easy installation and fabrication to support more efficient construction
- 30-year warranty for long-term confidence

BUILDING MATERIALS MADE FROM WASTE, DESIGNED TO BE USED AGAIN.

saveBOARD transforms everyday packaging waste into durable, high-performance building materials, creating a practical circular alternative to traditional wall linings, ceiling tiles and hoarding products.

Manufactured in Australia and New Zealand, every saveBOARD sheet contains at least 20kg of recycled waste, diverting materials from landfill and giving them a valuable second life within the built environment.

Designed for demanding applications, saveBOARD provides a hard-wearing, low-maintenance surface with inherent resistance to moisture and mould. The range offers a practical solution across residential, commercial and construction environments where durability, performance and reduced environmental impact matter.

Importantly, the circular story doesn't end once the product is installed. saveBOARD products are 100% recyclable by saveBOARD, with recovered offcuts and end-of-life boards able to be returned and remanufactured into new sheets.

FEATURES & BENEFITS

- At least 20kg of recycled waste in every sheet
- Circular by design, with offcuts and end-of-life products able to be remanufactured into new boards
- 100% recyclable by saveBOARD
- High-performance and hard-wearing for demanding applications
- Inherently moisture and mould resistant
- Low maintenance for long-term practicality
- Low-carbon material providing an alternative to conventional building products
- Versatile applications across wall linings, ceiling tiles and hoarding
- Made in Australia and New Zealand

STRUCTURAL TIMBER

STRENGTH AND RELIABILITY AT THE CORE OF EVERY BUILD.

McCormacks structural timber range provides dependable, high-performance solutions for residential and commercial construction, with products selected to meet the strength, reliability and compliance requirements of modern building.

Backed by McCormacks long-standing experience in timber supply, the structural range gives builders, fabricators and merchants access to quality structural products for a wide variety of building applications.

The range also includes FSC® certified structural timber options, providing greater flexibility for projects with responsible sourcing and certification requirements.

FSC® CERTIFIED OPTIONS AVAILABLE ON REQUEST

FEATURES & BENEFITS

- Engineered for strength and reliability across structural building applications
- Suitable for residential and commercial construction
- Compliance-focused products for confidence when specifying and building
- FSC® certified options available to support project and sustainability requirements
- Reliable timber supply backed by McCormacks extensive industry experience
- Versatile structural solutions for a wide range of construction applications

TERRA LANA

WOOL INSULATION & LANDSCAPING PRODUCTS

NATURAL WOOL SOLUTIONS FOR HEALTHIER BUILDINGS AND MORE SUSTAINABLE LANDSCAPES.

Proudly supplied in Australia by McCormacks, Terra Lana harnesses the natural performance of wool to create high-quality insulation and landscaping products designed with people and the environment in mind.

For more than 20 years, Terra Lana has been transforming sustainably sourced wool and recycled fibres into innovative products for the built and natural environment. From high-performance thermal and acoustic insulation to natural landscaping solutions, the range makes use of wool's unique ability to manage moisture, regulate temperature and perform over the long term.

Manufactured in New Zealand using a circular, closed-loop approach, Terra Lana prioritises responsible material use, waste reduction and product stewardship. As the exclusive Australian supplier, McCormacks Australia brings Terra Lana's innovative wool solutions to projects across Australia.

WHY TERRA LANA?

- Natural thermal, acoustic and moisture-management performance
- Healthier wool insulation that is Red List Free and Declare labelled
- Long-lasting performance, backed by a 50+ year insulation warranty
- Circular manufacturing with a focus on reducing and recycling waste
- Sustainably sourced and manufactured in New Zealand
- Wool-based solutions for both building and landscaping applications

HIGH-PERFORMANCE TIMBER, NATURALLY REFINED.

Earthen Plus is a high-performance range of sustainable timber products and profiles designed for both exterior and interior applications.

Manufactured in New Zealand from premium quality New Zealand radiata pine, the range combines the natural character and versatility of timber with innovative treatment and performance-enhancing technologies to improve durability, stability and long-term performance.

Earthen Plus incorporates technologies including MicroPro treatment, thermal modification, rotational surface exfoliation and Grimes controlled erosion coatings, with different products and profiles designed to suit a wide variety of architectural and building applications.

The result is a versatile timber range that delivers high performance, a refined natural finish and excellent value across residential and commercial projects.

FEATURES & BENEFITS

- Premium New Zealand radiata pine selected for quality and consistency
- Interior and exterior options across a versatile range of profiles and applications
- Enhanced durability and performance through advanced timber treatment technologies
- Improved stability with thermally modified options suited to demanding and exposed applications
- MicroPro treated options providing advanced timber protection
- Rotational surface exfoliation creating a distinctive, refined timber surface
- Grimes controlled erosion coatings available across selected products for protection and finish
- Natural timber aesthetic suited to contemporary architectural applications
- Manufactured in New Zealand with a focus on quality and performance

THERMORY®

REAL WOOD. ENHANCED BY HEAT. BUILT TO LAST.

Thermory combines the natural beauty and character of real wood with advanced thermal modification technology to create premium timber products for interior and exterior applications.

Using only heat and steam, with no added chemicals, the Thermory process modifies the timber throughout the entire board rather than simply treating its surface. This enhances dimensional stability, durability and resistance to moisture and changing climatic conditions while retaining the warmth, texture and natural aesthetic of real timber.

With a broad selection of profiles and surface finishes, the Thermory range offers high-performance solutions for decking, cladding, flooring, wall panelling, saunas and other architectural applications.

FEATURES & BENEFITS

- 100% natural thermal modification using only heat and steam
- No added chemicals used in the modification process
- Enhanced dimensional stability for reliable performance as conditions change
- Improved durability for long-lasting interior and exterior applications
- Reduced moisture sensitivity through modification of the entire board
- Consistent performance throughout rather than surface-only treatment
- Versatile applications including decking, cladding, flooring, wall panelling and saunas
- Wide range of profiles and finishes for greater architectural flexibility
- Natural timber character with the warmth, texture and aesthetic of real wood
